PROJECTOR LIFT SYSTEM (4,2 MTR)

PPL 3535

PPL 3535 is a professional full automatic projector lift system, especially designed for use on high ceilings and/or easy projector servicing.

The PPL 3535 projector lift system has a unique microprocessor controlled operation and height setting. The advantages are quick installation and very accurate height positioning. It has a whisper quiet operation and 3 programmable positions: stow position, show position and service position. Connecting to a automation system as Crestron, AMX or others is easy with the included interface. The maximum drop down distance is 4,2 mtr.

- Electronic adjustable height position
- Including universal projector adapter
- Whisper-quiet operation
